

HACKBASE HACKATHON

PPT SUBMISSION TEMPLATE · EDITION 2

Project Title

[Enter Your Project Title Here]

Team Name

[Your Team Name —must match Unstop]

Team Members

[Member 1] · [Member 2] · [Member 3] · [Member 4]

Tracks Chosen

Healthcare

AI / ML

Web3 Development

Sustainability

IoT

Open Innovation

Delete tracks that don't apply —keep only the ones you're competing in.

01 PROBLEM STATEMENT & SOLUTION

P The Problem

- Who is affected, and how big is the problem?
- What's broken about current solutions or workarounds?
- Back it up —a stat, survey finding, or real example.
- Why does solving this matter, right now?

S Our Solution

- What exactly did you build? One clear sentence.
- How does it directly solve the problem above?
- What's the core innovation or clever part?
- What's the experience like for the end user?

Tip: keep each bullet to one line on the actual slide —this is prompt text to guide what you write.

02 / 08

02

TECH STACKS & PUBLIC API'S DETAILS

Frontend

Frameworks / libraries used to build the UI.

Backend

Server, language, and framework powering the logic.

Database

Where and how your data is stored.

Public APIs

Third-party APIs integrated, and what each does.

AI / ML Tools

Models, libraries, or platforms used, if any.

Other Tools

Hosting, deployment, design, or dev tools used.

Replace each card's italic prompt with your actual stack —add or remove cards as needed.

03

WORKFLOW DIAGRAM

[Paste or draw your workflow diagram here]

Show the step-by-step journey —from a user action to the final output. Use numbered steps and arrows so a judge can follow it in 10 seconds.

Replace this placeholder with your own diagram image or shapes —keep the flow left to right.

04

ARCHITECTURE DIAGRAM

[Paste or draw your architecture diagram here]

Client Layer

Application Layer

Data Layer

In frastructure

Show the components and how they connect —client, servers, databases, APIs, and hosting/infra. Label the tech used at each layer.

A clean box-and-arrow diagram works better than a screenshot —recreate it with shapes if you can.

05

USP (UNIQUE SELLING POINT)

1

What's New

The one thing no existing solution does the way yours does.

2

Why It Wins

The measurable impact or advantage for the end user.

3

Why It Lasts

What makes this defensible, scalable, or hard to copy.

Be specific —name the competitor or existing tool you're better than, if you can.

06

FEASIBILITY

Technical Feasibility

What's already working today, and what's left to build after the hackathon?

Market Feasibility

Is there real demand? Who would actually adopt or pay for this?

Roadmap & Cost

What's the realistic timeline and cost to take this from prototype to product?

Judges weigh feasibility heavily —be honest about what's built vs. what's planned.

To Be Kept In Mind

(To Be Deleted Before Submission)

1

Maintain the **official logos** and required **template structure**.

2

Limit the presentation to **8 slides**, including the Title Slide.

3

Team Name & Project Theme must exactly match the details submitted on Unstop.

4

Keep the presentation **concise, structured, and relevant** to the proposed solution.

5

Submit the final presentation in **PDF format**. GitHub Repository & Live Demo links are optional but **prioritized during evaluation**.
